

## **Atle Wibe**

### **Job address:**

- NORSØK, Gunnars vei 6, N-6630 Tingvoll, Norway
- Phone: +47 40 48 00 87
- E-mail: atle.wibe@norsok.no

### **Current position:**

- Research Scientist, NORSØK – Norwegian Centre for Organic Agricultural (2016- )

### **Field of research:**

- Insect pest management, chemoecology, insect-host interaction, insect behaviour, organic agriculture, electrophysiology, analytical organic chemistry

### **Ongoing research projects:**

- Fencing combined with insect traps to protect strawberries against pest insects
- Ozone-water treatment of potato to prevent fungal diseases

### **Education**

- 1997: Dr. scient. (Ph.D. equivalent) Norwegian University of Sciences and Technology (NTNU), Norway. Thesis: *Identification of conifer volatiles detected by receptor neurons in the pine weevil (*Hylobius abietis*): analysed by gas chromatography linked to electrophysiology and to mass spectrometry* (ISBN: 82-7861-049-5)
- 1991: Cand. scient. (Master of Science equivalent) University of Trondheim (UNiT), Norway. Thesis: *Vertsdufter hos gransnutebillen (*Hylobius abietis*): kopling av elektrofysiologi og gasskromatografi for identifisering av vertsdusfer.*

### **Previous positions:**

- 2015 Research Scientist, Bioforsk/NIBIO - Centre of Competence Organic Agriculture and Food Production
- 2013 Advisor, Research Council of Norway, location office in Brussel, Belgium, working period 3.5 months.
- 2005-2014 Research Director, Bioforsk Organic Food and Farming Division (/Norwegian Centre for Ecological Agriculture)  
Research projects founded by the Research Council of Norway (NFR):
  - *Softpest Multitrap, ERA-net CORE Organic II project with 8 partners from 6 countries.*  
*Role in project: Coordinator and executing researcher*
  - *Control of weevils in strawberry by using plant volatiles and other alternative methods.*
  - *Reduced ticks and tick-borne diseases in sheep by integrated management*
- 2002-2005 Research Scientist, Norwegian Centre for Ecological Agriculture.  
Research project founded by NFR:
  - *Development of plant protection for strawberry (*Fragaria xananassa*) against damage caused by the strawberry blossom weevil (*Anthonomus rubi*)*
- 1999-2002 Post. Doc./Research Scientist, Norwegian University of Science and Technology (NTNU), Department of Biology. Research project founded by the NFR and World Health Organization (WHO):
  - *Identification of host volatiles detected by malaria mosquitoes (*Anopheles gambiae*), electrophysiology and behaviour.*
- 1997-1999 Associated professor (Nord Trøndelag College (HiNT), Steinkjer, Norway)

- 1994-1997 Lecturer (HiNT, Steinkjer, Norway)
- 1992-1994 PhD-student, University of Trondheim
- 1988-1993 Teaching at UNiT, Dep. of Zoology
- 1989-1992 Engaged in projects studying warble flies, the pine weevil, bark beetles, 12 months
- 1987-1988 Control of pollution from agricultural activity, Nord-Trøndelag County, 5 months

### Research articles

- Baroffio, C.A., Sigsgaard, L., Ahrenfeldt, E.J., Borg-Karlsson, A.K., Bruun, S.A., Cross, J.V., Fountain, M.T., Hall, D.R., Mozuraitis, R., Ralle, B., Trandem, N., **Wibe, A.** (2018). Combining plant volatiles and pheromones to catch two insect pests in the same trap: Examples from two berry crops. *Crop Protection* 109: 1-8.  
<https://doi.org/10.1016/j.cropro.2018.02.025>
- Fountain, M.T., Baroffio, C., Borg-Karlsson, A.-K., Brain, P., Cross, J.V., Farman, D.I., Hall, D.R., Ralle, B., Rendina, P., Richoz, P., Sigsgaard, L., Storberget, S., Trandem, N., **Wibe, A.** (2017). Design and deployment of semiochemical traps for capturing *Anthonomus rubi* Herbst (Coleoptera: Curculionidae) and *Lygus rugulipennis* Poppius (Heteroptera: Miridae) in soft fruit crops. *Crop Protection* 99: 1-9.
