

Atle Wibe

Addresses:

- NORSØK, Gunnars vei 6, N-6630 Tingvoll, Norway
- Phone: +47 40 48 00 87
- E-mail: atle.wibe@norsok.no

Current position:

- Scientific Researcher, NORSØK – Norwegian Centre for Organic Agricultural

Field of research:

- Organic agriculture, pest insect management, chemoecology, insect-host interaction, insect behaviour, electrophysiology, analytical organic chemistry

Education

- 1997: Dr. scient. (Ph.D. equivalent) Norwegian University of Sciences and Technology (NTNU), Norway. Thesis: *Identification of conifer volatiles detected by receptor neurons in the pine weevil (Hylobius abietis): analysed by gas chromatography linked to electrophysiology and to mass spectrometry* (ISBN: 82-7861-049-5)
- 1991: Cand. scient. (Master of Science equivalent) University of Trondheim (UNiT), Norway. Thesis: *Vertsdumper hos gransnutebillen (Hylobius abietis): kopling av elektrofysiologi og gasskromatografi for identifisering av vertsdumper.*

Previous positions:

- 2015 Researcher, Bioforsk/NIBIO - Centre of Competence Organic Agriculture and Food Production
- 2013 Advisor, Research Council of Norway, location office in Brussel, Belgium, working period 3,5 months.
- 2005-2014 Research Director, Bioforsk Organic (/Norwegian Centre for Ecological Agriculture) Research projects founded by the Research Council of Norway (NFR):
 - *Softpest Multitrap, ERA-net CORE Organic II project with 8 partners from 6 countries. Role in project: Coordinator and executing researcher*
 - *Control of weevils in strawberry by using plant volatiles and other alternative methods.*
 - *Reduced ticks and tick-borne diseases in sheep by integrated management*
- 2002-2005 Researcher, Norwegian Centre for Ecological Agriculture. Research project founded by NFR:
 - *Development of plant protection for strawberry (Fragaria xananassa) against damage caused by the strawberry blossom weevil (Anthonomus rubi)*
- 1999-2002 Post. Doc./ researcher Norwegian University of Science and Technology (NTNU), Department of Biology. Research project founded by the NFR and World Health Organization (WHO): *-Identification of host volatiles detected by malaria mosquitoes (Anopheles gambiae), electrophysiology and behavior.*
- 1997-1999 Associate professor (Nord Trøndelag College (HiNT), Steinkjer, Norway)
- 1994-1997 Lecturer (HiNT, Steinkjer, Norway)
- 1992-1994 PhD-student, University of Trondheim
- 1988-1993 Teaching at UNiT, Dep. of Zoology
- 1989-1992 Engaged in projects studying warble flies, the pine weevil, bark beetles, 12 months

- 1987-1988 Control of pollution from agricultural activity, Nord-Trøndelag County, 5 months

Referee

Journal of Insect Physiology, Journal of Agricultural and Food Chemistry, Behavioural Ecology, Silva Fennica, Naturwissenschaften, Crop Protection.
